

Visual Sprint Planner

Visualize the Sprint Planning Process with Ease

Improve the Teamwork of Your Team and Help Your Team Adapt Quickly with Just One Tool

Visual Sprint Planner (VSP) allows you to achieve **predictability** and **transparency** in your company. It's fully integrated with your team's Jira scrum board and lets you visualize sprint planning and execution processes, so you can react to any unexpected changes. Choose VSP to complete each sprint and fix any unforeseen issues that arise.

Increase the work predictability

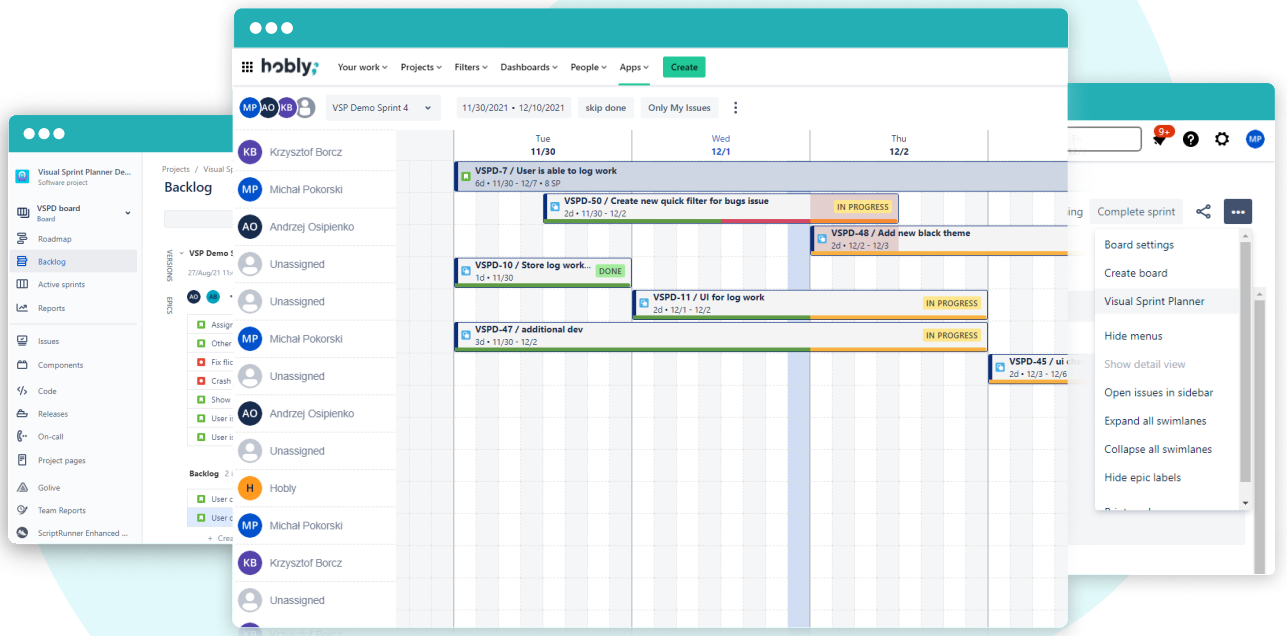

Eliminate any unnecessary feedback and updates from your teammates while maintaining a high level of effectiveness. Reduce the time spent on meetings and statuses while working remotely. Evolve the sprint execution process to make it seamless and entirely visual. Get all the information you need by just looking at one view and benefit from the extra time.

Improve team coordination

Eliminate any unnecessary feedback and updates from your teammates while maintaining a high level of effectiveness. Reduce the time spent on meetings and statuses while working remotely. Evolve the sprint execution process to make it seamless and entirely visual. Get all the information you need by just looking at one view and benefit from the extra time.

Achieve full transparency

See the current state of all tasks quickly and adapt accordingly. Effortlessly review the commitments of all members of your team and avoid bottlenecks in your sprint. Simplify the monitoring progress and easily access all the data needed for efficient planning.

Key Features of Visual Sprint Planner:

- Plan your sprint directly in Jira using Scrum Boards and Jira Issues;
- Learn how your sub-tasks impact tasks based on same-time visualizations;
- Update your plans using easy drag and drop controls;
- Visualize tasks and sub-tasks in real-time;
- Compare the "planned" vs. "actual time spent" using Jira native time tracking on a visual timeline;
- Find out which team members have too much work and who have to wait for other team members.

Why us?

Visual Sprint Planner was born from thousands of hours of experience working with agile and project teams. We learned about issues with transparency, predictability, and the inability to react to changes our partners and clients encounter swiftly. And we built VSP to address all those problems. Not only that, we implemented VSP in our own company, and our endorsement comes from our own experience.
